Thousands of women in the UK are unaware that they have a bleeding disorder

Von Willebrands is the **most common inherited bleeding disorder**, caused by deficiencies or defects in a certain substance in the blood that helps clots to form

Frequent and heavy periods

Bruise Easily

Frequent or heavy nosebleeds

Bleeding heavily after surgery

Prolonged bleeding after a dental procedure

Abnormal bleeding after child birth

It is important to talk to your doctor if you have one or more of these symptoms
Treatments are available
